

Vseries featuring Sullair Smart Technology

Lubricated Rotary Screw
Air Compressors

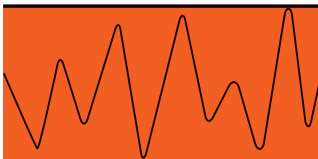

40 to 200 HP

 **SULLAIR**

When you invest in Sullair operating consistency are your dividends. The

The Sullair **V**series compressors with Sullair Smart Technology provide:

- Excellent energy savings
- Relief from potential peak demand charges
- Possible utility company rebate
- Alleviation from electrical harmonics
- Stable system pressure
- Consistent product quality
- Reduced system air leaks
- Reduced storage requirements
- Flexibility for future growth
- Lowest 5-year Life cycle cost

Conventional System Pressure

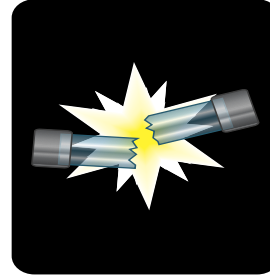

Sullair **Vseries System Pressure**

Stable system pressure improves the consistency of your process and product to reduce product rejects.

In addition, it:

- Lowers air system leaks.
- Reduces system storage requirements.
- Provides increased energy savings to increase profits.

Soft start is standard.

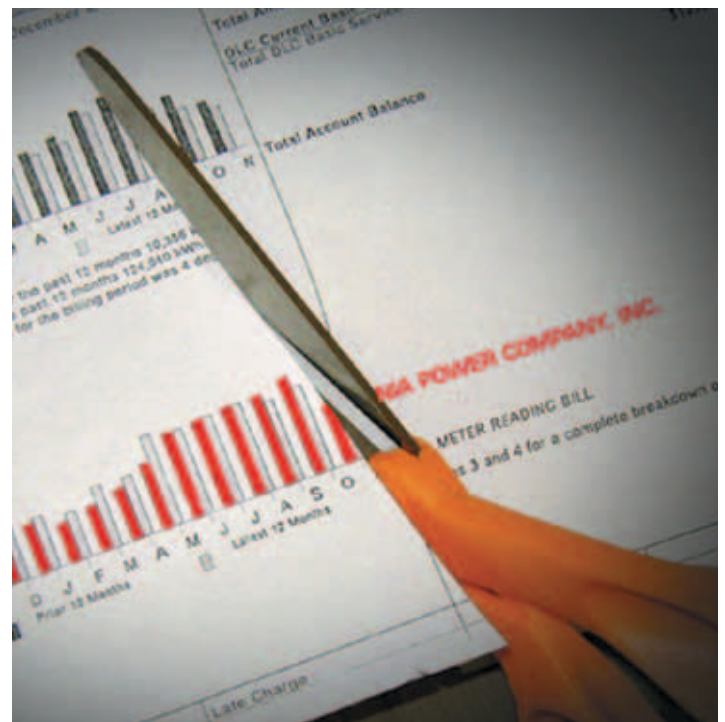

- Eliminates the need for Wye Delta and other soft starters.
- Avoids high electrical current at start-up.

Variable Speed Drive avoids potential peak demand charges.

Vseries compressors provide the highest power factor over the entire frequency range, often avoiding utility company penalties.

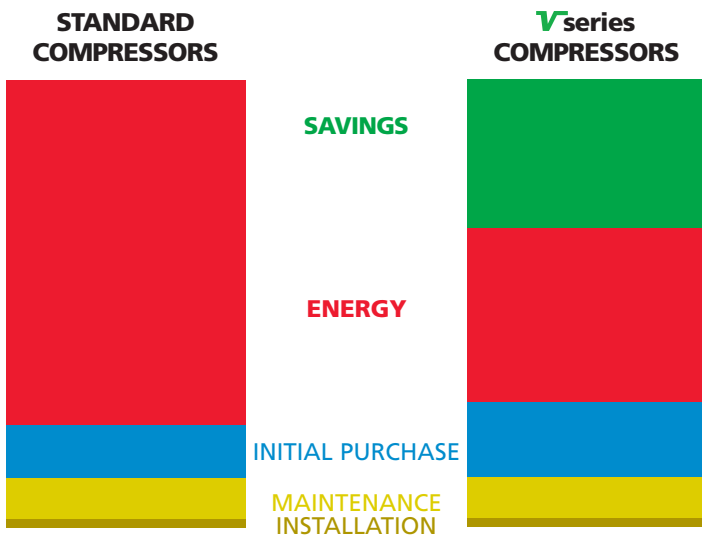

Unlimited starts and stops

- NO need to control the number of hot or cold starts.
- Unlimited starts and stops save electrical costs.

Air's Vseries compressors, and energy efficiency that's just the beginning.

Your compressed air system can improve your bottom line: **35% energy savings in the first 5 years.** In just 5 years, the electrical power cost to operate a standard compressor can be more than 6 times greater than its purchase price.

Total compressor flexibility... automatically, with safety built-in
Sullair Vseries compressors provide the flexibility to vary both capacity and pressure.

The compressor that grows with you
This flexibility makes it possible to "grow" your air system without adding another compressor.

FOR TODAY, TOMORROW, AND THE FUTURE

Because of its quality, only Sullair has the confidence to offer this unrivaled warranty as STANDARD!

You don't have to ask for it and it costs you nothing. Sullair's Ultra Emerald Warranty covers your compressor's major components for 5 years -- *plus its variable speed drive*. Sullair even includes parts and labor.

- Variable speed drive
- Compressor air-end
- Compressor motor
- Air/Fluid receiver
- Compressor fluid cooler
- Aftercooler

SULLAIR SMART It's the BRAIN behind

Sullair Smart Technology gives you:

- Simplicity
- Flexibility
- Reliability
- System protection

SIMPLICITY: User-Friendly

- User-friendly set-up via Supervisor Controller.
- Simplified user interface and adjustment.
- Reduced number of components.
- Instantaneous access and to all cumulative "Vital Statistics".

FLEXIBILITY: Pressure/Capacity

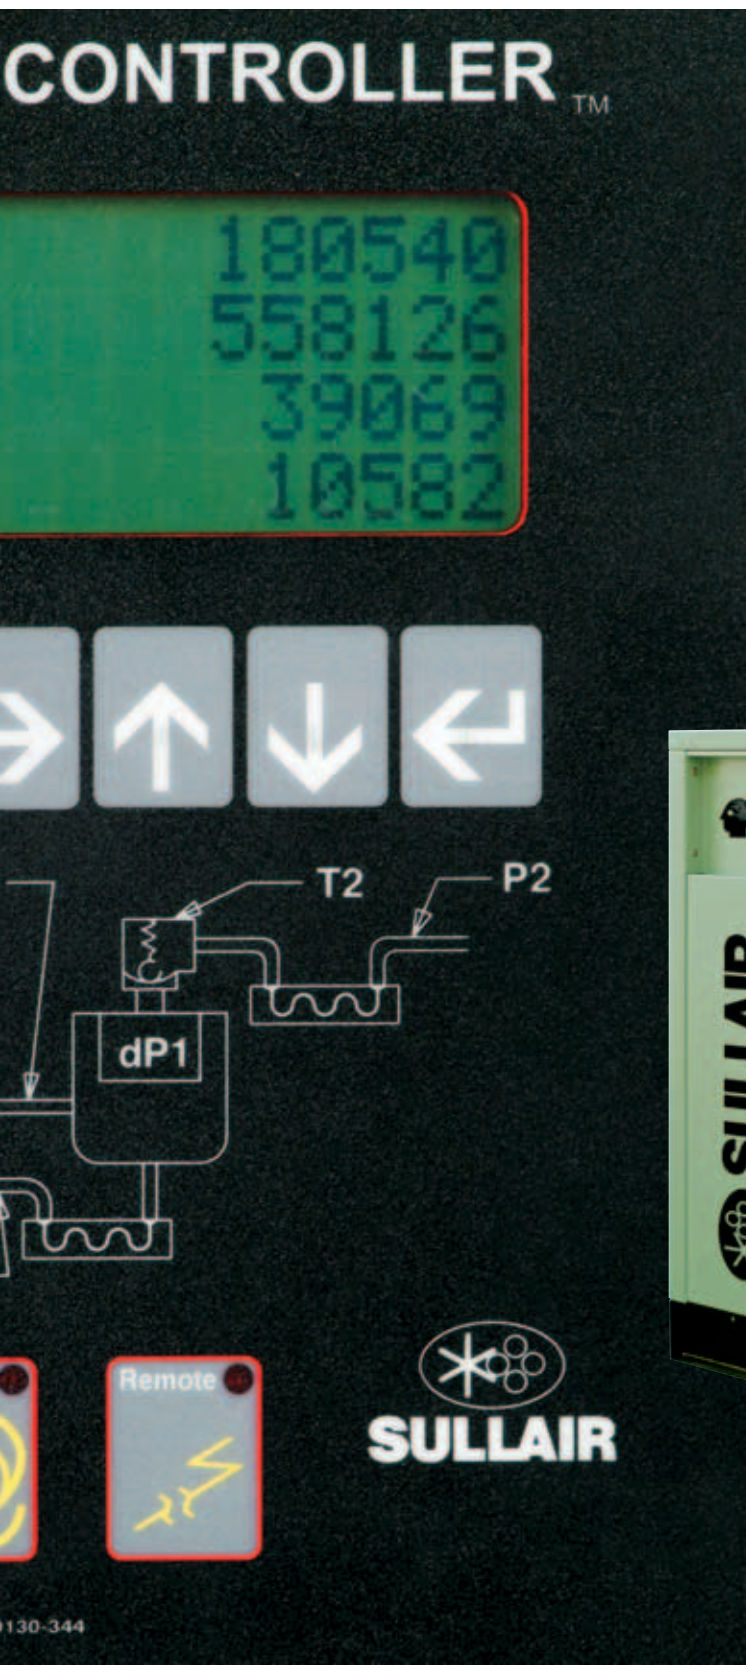

- It's intuitive! Enter three parameters:
 - Unload Pressure
 - Load Pressure
 - Required Pressure
- You set the pressure, **Sullair Smart Technology** takes care of the rest.

RELIABILITY

- Designed from the frame up as a complete package -- not built with a variety of off-the-shelf components.
- Multiple signal wires eliminate relays.

TECHNOLOGY... Behind the BRAWN.

SYSTEM PROTECTION: Built-in Harmonic Filtration is Standard

- Harmonic filters protect and lengthen the life of all compressor components, as well as other electrical devices on your power grid.
- Provide cleaner power to the motor
- Sullair has your system in mind by furnishing this protection at no additional cost to you. It's an expensive add-on from other manufacturers.
- Avoid purchasing additional costly corrective devices.

Open and enclosed models available.

Sullair **V**series... the

Every Sullair **V**series compressor offers you more:

The reliable Sullair air end

- Longer average bearing life, designed for over 100,000 hours of service.

Superior package design

- Sullair Smart Technology matches air-end and VSD for optimum efficiencies.
- Air-cooled or water-cooled models.
- Available with **or** without enclosure.

Premium efficient motor

- Improved energy conservation.
- 250,000-hour insulation life.

Choice of compressor fluids

- Sullube™ is standard factory fill.
- Biodegradeable.
- 5-Year Warranty.
- 24KT™ is optional.

Multi-stage air/fluid separation

- Dual nested separator, reduces carry-over to less than 1 ppm.

Fiberglass fluid filter

- Up to 20% more efficient than conventional paper elements.
